

invite you to join a breakfast workshop on

# FARM DATA

How can it be better used to promote soil health, sustainable agriculture, and the future of agronomy?

WEDNESDAY 7<sup>TH</sup> DECEMBER

9:00 – 12:00

(including free breakfast!)

*Is historic data on farm soils and management under-utilised? How could it be used to **identify best practice**? How could it help farms **adapt to a changing climate**? How could it **drive adoption** of sustainable practices? What's the **future of agronomy** as farmers try to reduce inputs? Will interpreting farmers' data play a bigger role?*

*Join us for an **interactive session of leading agronomists** to explore these questions. As well as hearing an update from Dr Liz Stockdale on the Soil Health Scorecard, we will breakout into workshops to explore and understand your perspectives. With free breakfast at the start, refreshments throughout, and the opportunity to meet other leading agronomists and farm advisors interested in how historical farm data can be better used.*

**08:30-09:00:**

Arrival and refreshments

**09:00-09:15:**

Update on **Soil Health Scorecard** from Dr Liz Stockdale

**09:15-12:00:**

Guided **workshops** to explore, understand, and discuss your perspectives on this topic

**12:00 onwards:**

**Networking** time for all attendees (with complimentary refreshments!) before the IFS conference starts at 14:00
