# **FarmED Supported Research**

- Various undergraduate dissertations
- PhD research including...
- Nitrous Oxide emission study from the herbal ley/arable rotation (Birmingham Uni currently being in written up)
- > Mycorrhizal associations/colonisation rates (Oxford Uni year 2 data being collected)
- The Centre for High Carbon Capture Cropping (CHCx3) is a four-year, 22-partner project, led by NIAB's Dr Lydia Smith
- The research aims to help UK farmers and growers target Net Zero and build farming resilience through diversifying their arable and forage cropping. It will enable new revenue sources through a carbon marketplace and support enhanced value chains for industries such as textiles and construction
